

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

CORRIGENDA TO VOLUME II.

- Page 24: The R. A. and Dec. are for 1855.0.
- " 41: Remove the title-page preceding page 41.
- " 50: The woodchoppers in the Sierra Nevada have found, by examining the injuries to the trees felled there, that it has been about one hundred years since so much snow fell in the main range. The injuries to trees on Mt. Hamilton seem to indicate something of the same sort, although no large trees have been felled and their rings of annual growth counted. The conclusion is that the winter of 1889-90 was the severest for a century, so far as snowfall is concerned. The winter of 1861 is the only one since 1849 which can be compared with it.
- " 85: The errata in the addresses of members will be corrected in the next published list.
- " 99: lines 20-22, for 143, 248, 194, 175 read 194, 248, 175, 143.
- " 126: for *Astronomische* read *Astronomischen*.
- " 139: for N. H. HEMING read N. H. HEMIUP.
- " 204: (last lines) for "it shows an astonishing amount of detail, which requires no explanation and" . . . read "of detail, independently registered and"
- " 205: line 6; for 0".97687 read 0".95687.
- " 209: (middle of page) for "twenty-five times" read "two hundred times"
- " 214: No. 2; for Sinus Iridium read Sinus Iridum.
- " 257: line - 16; omit *Lyra*.
